NOW ...
through Friday, September 4, 2015.

Course Description:

This course will cover what the cloud really is, security risks, how it can be utilized for, emergency response, daily operations, and incident management. It will demonstrate how the cloud interacts with tablets and how any budding officer can create change within an organization. Finally, it will tie together tablet technology use on the floor for every day operations and overall cost savings related to other conventional mobile computing.

Instructor Biography:

Aaron Lambert is a Lieutenant with Bedford NH Fire Department. Lt. Lambert has been a part of the Bedford Fire Department for 14 years, and has been in the fire service for over 20 years with specialized skills in technology and IT services. Lt. Lambert has been one of the first to implement tablet technology into the New Hampshire fire service. He holds a bachelor's degree in cloud services and manages the technological applications within the BFD. Additionally, he provides consulting in these topics.
